DETAILED ACTION

Claim Rejections - 35 USC § 112

Claim 4 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 4 recites "player tracking hosts associated...are associated with said host". It is not clear which "host" is meant in the second recitation. "Bonus tracking host" is suggested, if such is intended.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(e) the invention was described in-

(1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effect under this subsection of a national application published under section 122(b) only if the international application designating the United States was published under Article 21(2)(a) of such treaty in the English language; or

(2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that a patent shall not be deemed filed in the United States for the purposes of this subsection based on the filing of an international application filed under the treaty defined in section 351(a).

Art Unit: 3714

Claims 1-18 are rejected under 35 U.S.C. 102(e) as being clearly anticipated by Acres 6.319,125. The patent to Acres discloses a method and apparatus for controlling a bonusing promotion system using a bonus server interconnected to a plurality of gaming devices. Acres system works in combination with a player tracking server, and bonus prizes can be in multiple forms and based upon multiple user configurable criteria. The reference is deemed to meet the claims as broadly claimed as is evident upon study.
